

How To Use the Train Reaction® System

1.

Lower handle and open hidden zippered pocket located just above handle.

2.

Pull TRS Strap from hidden pocket.

3.

Line the luggage up and lead with the smaller bag. Partially extend the retractable handle as shown.

4.

Slide TRS strap over leading piece's retractable handle. Slide strap to the base of the handle.

5.

Fully extend handle, keep luggage aligned and tilt ensemble until it self balances on all 4 wheels.

6.

Adjust the angle of the TRS system to fit your height by tightening or loosening the adjustable strap.

7.

Accessory 1: Shoulder Bag

Accessory 2: Backpack III

Add accessories and travel with ease. Place accessories on retractable handle (1) or side release buckle (2) to maintain a perfect center of gravity.

8.

Included

Attach a J-Hook to the front buckle of a Carry-On III to carry non rolling options like the Shoulder Bag II.

Taller accessories such as a backpack, may not require a j-hook and may simply be attached to the side release buckle

IMPORTANT: When finished using TRS, always stow the TRS strap back inside the hidden pocket. Failure to stow TRS Strap in zippered pocket will void warranty.
